Lumics Products Displayed at CIOE Exhibition 2020 in Shenzhen

Due to the lasting travel restrictions related to the Corona pandemic, we are not able to travel to the CIOE tradeshow in Shenzhen. We deeply regret this!

However, our Lumics booth at the German Pavilion will be very professionally staffed by our long-standing sales partner in China, Connet Fiber Optics Co. Ltd. from Shanghai: www.shconnet.com.cn

Lumics works with Connet since more than 12 years and their staff is very familiar with our entire product range. Of course we will be supporting Connet remotely from our offices.

Feel free to schedule an appointment with them. They can also organize conference calls or video meetings with us (Chinese language possible).

The 22nd CIOE 2020 (China International Optoelectronic Exposition) will be held on September 9-11, 2020 at the Shenzhen World Exhibition & Convention Center.

The exhibition with 3,000 exhibitors and more than 60 seminars, forums and networking activities covers optoelectronic components, devices and equipment.

The Lumics booth is part of the German Pavilion in Hall 8.

Our exact location is 8D03-3: <https://cioe.german-pavilion.com/zh/exhibitors/86309/>

Our entire product portfolio will be displayed at our booth.

Lumics GmbH in Berlin is a class-leading manufacturer of diode lasers, fiber coupled single- and multi-mode laser diode modules and complete OEM laser solutions based on Lumics' patented in-house single emitter technology.
